OBJECTIVE

Recent Computer Science graduate seeking Automation QA position, leveraging skills in playWright(Automation Framework), JavaScript, React, Redux Toolkit, REST APIs, and Tailwind CSS to create and test responsive and user-friendly web applications.

EDUCATION

Bachelor of Technology, Global Group of Institutes, Amritsar   2020-2024
Computer Science & Engineering.

Senior Secondary Education, Lakshminath Bezbaruah Academy   2018 - 2020

TECHNICAL SKILLS & INTERESTS

Languages:	C++, HTML/CSS, JavaScript, Python, MySQL.
Frameworks & Libraries:	playWright Bootstrap, Tailwind CSS, React.js, Redux, REST APIs.
Development Tools:	VS Code, Git/Github, Node Package Manager, Chrome Development Tools.
Coursework:	Data Structures, Algorithm Analysis, Computer Networks, Operating System.
Area of Interest:	Web Development, Software Development AI/Ml, Entrepreneurship, Sports.

EXPERIENCE

Freelance AI Code Evaluator   November 2023 - Present
Scale AI   *Remote*

- Evaluate LLM responses based on prompt requirements.
- Test response code to analyze the performance of code and optimize the code if required.
- Submit evaluation report.

Front End Developer Intern   July 2023 - September 2023
The Iron Networks   *Mohali, Punjab*

- Developed responsive user interfaces using HTML, CSS, and JavaScript during the internship.
- Implemented design mockups into functional web components, collaborating with senior developers to enhance user experience.
- Gained hands-on experience in modern front-end frameworks, applying best practices in web development and version control.

PROJECTS

Real-Time Chat Application. Developed a real-time chat application using React, Node.js, Express.js, MongoDB, and Socket.io. The app features secure user authentication, instant messaging, and persistent chat history. Deployed on Vercel for high availability and performance. (Try it here)

E-Commerce Application. Built a full-featured e-commerce website using React.js, Redux Toolkit, Node.js, and MongoDB. Integrated Stripe for secure payment processing and implemented an emailing system for order confirmations and user notifications. The platform includes product management, user authentication, and a responsive design, ensuring a smooth shopping experience.

ACHIEVEMENTS

- Completed a six-week industrial training program in web development, gaining proficiency in HTML, CSS, JavaScript, and React.js.

- Successfully completed the Infosys Springboard program, acquiring essential web development skills and industry knowledge.

LEADERSHIP

- **Student Coordinator, Google Developer Student Club:** Led initiatives, organized events, and facilitated workshops to promote tech education and community engagement among students.
